-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The amendment received 11/2/07 has been made of record. Claims 1-7, 9 and 11-15 are pending.

Claims 1-3, 5-7, 9 and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Botros.

This rejection is maintained substantially as set forth in the previous office action with the exception that claims 4 and 15 are no longer included.

Applicants' newly added limitation to a polypropylene homopolymer base as the grafting stock is seen as met by the reference since their grafting stock is an intimate mixture of propylene homopolymer and copolymer. Applicants' comprising language does not exclude propylene copolymers.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Botros in view of Godavarti et al and Castagna et al.

Botros has been discussed previously. Botros lacks an explicit teaching of amounts of wood to be incorporated and the use of a fatty acid ester lubricant.

Godavarti et al teach the use of 50-75% wood fiber in similar polypropylene-grafted polypropylene compositions.

Castagna et teaches the use of fatty acid esters as lubricant in similar graft modified polypropylene. Wood fiber compositions.

It would have been obvious to one of ordinary skill in the art to follow the teachings of the secondary references and arrive at suitable amounts of wood fiber and the selection of a fatty acid ester lubricant for its art known function.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F, 10:00-6:30.
